

MWWA SUMMER EXPO (Aug. 26th) – TECHNICAL SESSION

Learn about PVC, HDPE and DI Pipe

MWWA Course: MWWA 21-012

Many utilities are faced with the gigantic task of replacing miles of pipe that is nearing the end of its life. A proper evaluation of the pipe material options requires an understanding of each material's advantages and proper applications. This session will bring together industry experts from polyvinyl chloride pipe (PVC), high density polyethylene pipe (HDPE) and ductile iron pipe (DI). The presenters will also provide information regarding important design considerations and methods of installation.

Learning Objectives:

- Review the common types of pipe materials used in the water industry.
- Understand the important factors to consider when evaluating the pipe material selection.
- Discuss typical pipe projects and pipe installation considerations.

This course is approved for **2.0 TCHs** (Training Contact Hours) for Massachusetts Water and Wastewater operators as well as Rhode Island Water Operators.
