

Field Water Meter Installation Technicians

Mass Installation, Inc. (MII) is seeking qualified applicants for positions as Field Water Meter Installation Technicians. MII will provide requisite training which involves up to five (5) days of one-on-one instruction regarding proper procedures for installation and data capture necessary for all new water meter installations. Operating out of Norwood, MA since 1982, MII provides consulting, distribution, project management, testing and installation services for residential and commercial water meters and water reading technology.

Qualified applicants should have a background in plumbing, water works or general construction; applicants with experience in the field of water meter read technology will be considered highly advantageous. Prospective applicants must pass a thorough background check and review of driving record, have their own vehicle (but will be provided transportation allowance) and have their OSHA 10 card. Any additional licenses will be considered highly advantageous, but not required, including: hoisting license, confined space license, plumbing license. The majority of work is in Massachusetts and New England but applicants willing to travel outside of New England will be considered highly advantageous.

Hours: 7:30 a.m. - 4:30 p.m. Tuesday - Saturday. Payment is based on a dual rate: **Prevailing Wage** rates determined by the Commonwealth of Massachusetts is the basis for compensation while performing meter installations; minimum wage or an agreed upon amount based on prior experience is compensation while not performing prevailing wage work (travel).

Prevailing Wage Rates vary by City / Town: pay is approximately \$75-95 per hour

Applicants should send their resumes or direct any inquiries to both ABoyd@MassInstallation.com and MTravis@MassInstallation.com to schedule an interview.
