

Part-Time Laborer – Municipal Water Utility

The North Dighton Fire District Water Department is seeking a part-time laborer to assist with operations in a municipal drinking water system.

This position offers hands-on experience especially suited for a student or recent graduate interested in a career in drinking water systems, public works, environmental engineering, plumbing, etc.

Responsibilities include:

- **Assisting with residential water meter installation and replacement**
- **Collecting water meter readings and field data**
- **Performing water service line material identification (lead, copper, galvanized, etc.)**
- **Supporting basic field documentation and system records**
- **Some building/yard maintenance required**
- **Performing other related tasks as assigned**

Qualifications:

- **Current enrollment in, or recent graduation from, a plumbing, environmental engineering, drinking water, public works, or related program**
- **Interest in municipal water systems or utility operations**
- **Ability to perform outdoor field work**

Candidates interested in municipal infrastructure, water utilities, and public works are encouraged to apply.
